

ANALYTICS FIRE TEST TOOL

Fire Test Tool Main Screen

Specifications

Height: 4.86 inches (123.4 mm)
Width: 2.31 inches (58.6 mm)
Depth: 0.24 inch (6.1 mm)
Weight: 3.10 ounces (88 grams)
Display: 4 inch touch
Display Resolution: 1136 by 640 pixel at 326 ppi
Memory: 16 GB

Operation

The test tool, when activated, will play a video of a flaming fire. The test tool is then held in front of a camera for testing. The system analytics will analyze the simulated fire video and will initiate a flame event in response to the video image.

Refer to Fike Video Analytics Test Procedure document P/N 06-817 for test instructions.

Features

- Pre-loaded onto an Apple® iPod Touch®
- Easy user interface
- Can NOT be used in hazardous rated areas
- Small, hand-held device

General

The Fire Test Tool provides an easy method for functionally testing the operation of the Fike Video Analytics system for flame detection. This is an approved method for testing the system in lieu of using an actual pan fire.

The Fire Test Tool app is available for download from the Apple® app store onto any iPhone or iPod. Simply search for Fike Fire Test in the app store.
