

EMERGENCY TELEPHONE CABINET

DESCRIPTION

The Emergency Telephone Cabinet (ETC) (P/N 24-131) is equipped with an integral telephone handset that allows two-way emergency communication between firefighters and other authorized personnel connected to Fike's voice evacuation system.

When the handset is lifted from cradle, it activates a visible indication (LED) that contact has positively initiated. The ETC phone is ready for the operator to communicate with the system that is connected to the building firefighter emergency telephone communication system.

FEATURES

- Durable red finish and 16 gauge steel construction
- Back box can be surface or flush mounted
- Slide pin for removing and installing the door without tools
- Clinch type terminals for field wiring
- Pull handle with magnetic catch
- Overall dimensions: 10" x 13.75" x 4" (25 cm x 34.9 cm x 10 cm) (meets ADA)
- Semi-flush cutout dimensions: 9.25" x 12.8" x 4" (23.5 cm x 32.5 cm x 10 cm)
- "Connect" LED indicates connection to common talk circuit
- Optional flush mount trim ring

APPROVAL

- UL - UOXX.S2580
