INTELLIGENT FAAST ASPIRATION DETECTOR

DESCRIPTION
The Fike intelligent Fire Alarm Aspiration Sensing Technology (FAAST) aspirating smoke detector (P/N 68-140) combines dual source blue LED and infrared laser optical smoke detection with advanced algorithms to detect a wide range of fires while maintaining enhanced immunity to nuisance particulates. The detector continuously draws air from the controlled environment through a series of sampling holes to monitor the environment for smoke particles. This technology is typically used in early warning and very early warning applications.

The FAAST detector is fully integrated into Fike’s family of intelligent fire alarm and releasing control systems and reports just like other Fike devices.

Current status of the detector can be displayed in various ways:
- Displayed at Fike’s alarm control systems
- Integral display at the detector
- Internet via ethernet port using various devices (computer, iPad, etc)
- Integration with Precise® Vision event management software

The FAAST detector is compatible with Fike’s Cheetah® Xi 50, Cheetah Xi 1016, CyberCat® 50, CyberCat 254, and CyberCat 1016 control panels with firmware version 6.10 and higher. Its operating parameters and configuration are completed by the panels C-Linx® programming software. The on-board intelligence allows each FAAST detector to communicate its current status directly to other devices connected to the panel.

The digital communication between the detector and host control panel provides fast response and reliable communication.

To enable a full detection strategy, FAAST combines its advanced communications capabilities with an extensive range of customizable settings. The detector provides 5 configurable set point levels that can be programmed for latching or non-latching relays. To accommodate specific codes or environments, alarm delays can be set anywhere between 0 to 60 seconds. FAAST also supports two sensitivity modes: In acclimate mode, the detector automatically adjusts itself to current environmental conditions to reduce nuisance alarms. Day/Night/Weekend mode enable technicians to preset alarm thresholds based on routine changes in the environment.

FEATURES
- Full integration into Fike’s fire alarm and releasing control systems
- Wide sensitivity range: 0.00046 – 6.25 %/ft obscuration
- Five alarm levels and two sensitivity modes for flexibility
- Dual flow detection including both ultrasonic and electronic sensing for pipe and chamber air flow measurement
- A single device protects up to 8,000 square feet
- Advanced detection algorithms reject common nuisance conditions
- Patented particle separator and field-replaceable filter removes contaminants from the system
- Software support provides intuitive system layout, configuration and monitoring
- Standard onboard ethernet interface enables remote monitoring and e-mail status updates
- Fault indicators exhibit a broad spectrum of events
- Unique air flow pendulum graph verifies pipe network functionality
- Particulate graph displays subtle environmental changes for early problem indications
SPECIFICATIONS

External Supply Voltage: 18-30 VDC
Remote Reset Time: External monitor must be pulled low for a minimum of 100 ms
Power Reset: 1 sec.
Avg. Operating Current: 500 mA @ 24 VDC
Alarm: 650 mA – All relays active, all alarm levels displayed. Voltage @ 24 VDC
Relay: Contact Ratings 3.0 A @ 30 VDC, 0.5 A @ 125 VAC
Operating Temperature: 14°F (-10°C) to 131°F (55°C)
Sampled Air Temperature: -4°F (-20°C) to 140°F (60°C)
Humidity Range: 10 to 95% (non-condensing)
IP Rating: IP30
Coverage Area: 8,000 sq. ft. (743 sq. m)
Air Movement: 0-4,000 ft./min. (0-1,219 m/min.)
Height: 13.25 inches (33.7 cm)
Width: 13.0 inches (33 cm)
Depth: 5.0 inches (12.7 cm)
Cable Access: 4 1-inch (2.54 cm) cable entry holes on top and bottom of unit
Wire Gauge: 12 AWG (2.05 mm) max. to 24 AWG (0.5 mm) min.
Maximum Single Pipe Length: 262 ft. (80 m)
Maximum Branched (2) Pipe Length: 165 ft. (50 m) each branch
Maximum Air Inlet Holes: 40 holes
Network Outside Pipe Diameter: 1.050 inches, IPS (25 mm)
Internal Pipe Diameter: 0.591 to 0.827 inches (15-21 mm)
Sensitivity Range: 0.00046 %/ft. obs – 6.25%/ft. obs
Relays: 8 form C, 3 AMP, programmable latching or non-latching
Event Log: 18,000 events stored
Communication Network: Ethernet monitoring, 6 E-mail address alerts
Shipping Weight: 8.5 lbs. (3.8 kg), includes packing material
