VESDA LCD PROGRAMMER
UL 55198, ULC S7554, FM 10DO.AAY, LPC, S51, VdS

DESCRIPTION
The Programmer Module allows direct access to all VESDAnet devices on a VESDA smoke detection system. It allows configuration and status reporting of detectors, displays and interfaces and is required when installing, commissioning and maintaining a VESDA network. By incorporating a user friendly menu, navigation through the comprehensive features of VESDAnet is convenient and simple.

The programmer module is available as a handheld device or can be mounted into a LaserPLUS or LaserSCANNER detector, a remote mounting box or a 19in sub rack.

The two rows of large push buttons enable the user to log ON and navigate through the menu trees to the various command and parameter setting functions. The top row of keys are called “Soft Keys” and are assigned programming options appropriate to the screen being viewed.

Some of the parameters that can be accessed via the programmer include device status reporting, zone number and name allocation, flow normalization, alarm threshold setting (day, night, weekend), initiation of AutoLearn™, wiring order, relay testing and event log review.

Up to 14 assigned Users or Administrators with an individual 4 digit Personal Identification Number (PIN), and one Distributor, can log onto a VESDAnet system under one of three levels of access which are password protected.

User (USR) is only able to view parameters, check status, alarms and reset the system.

Administrator (ADM) has access to most commands and programming parameters.

Distributor (DST) is the topmost level and has unlimited access to all commands and parameters in the system.

Lost PIN numbers can be overcome by obtaining a once only pass number from your VESDA distributor.

The programmer automatically logs OFF when not in use for more than 10 minutes. The user is prompted with a beeping sound at 1 minute and at 15 seconds before log OFF. Any key may be pressed to cancel the automatic log OFF process.

PROGRAMMING FUNCTIONS
- System Configuration
- Detector Zone Configuration and set up
- Detector Zone Control
- System Status
- Smoke Threshold and Detector Sensitivity Settings
- Event Log Interrogation
- Commissioning and Testing
- Set Date and Time
- Referencing
- AutoLearn™
- Passwords and User Configuration
- System Fault Diagnostic
FEATURES

- User Friendly Menu System
- Supports Multiple Languages
- Single Point Access to Entire VESDAnet System
- Alarm and Fault Simulation
- Shows Wiring Order

- Locates Communications Failures
- Password Security
- Hand Held or Remote Mounting
- Automatic Logoff when Inactive
- Backlit LCD Screen

SPECIFICATIONS

Supply Voltage: 18 to 30VDC

| Connections       | Terminal connector to Head Processor Card or to expansion connector on another VESDA device | 15 pin D-type connector. VESDAnet cable required connect to detector or remote VESDAnet socket | RS485 VESDAnet field wiring. To Screw terminal blocks (30-12 AWG, 0.2-2.5mm²) |

Screen Display Size: 2.75in x 1.45in (70mm x 37mm), full graphic display, large characters, 8 lines, 21 characters per line, adjustable backlit screen with contrast control

Inactivity Time Out: 10 minutes (defaults to log on screen). Beeps at 1 minutes and then 15 seconds before logoff

Push Button Keys: 2 rows x 4 keys, each 0.75in x 0.50in (19mm x 12mm)

Security Access: 3 characters user ID

4 digit personal identification number (PIN) per User Number of User Levels: 10 USR, 3 ADM, 1 DST

Default ID:

USR - User (operator level)
ADM - Administrator (access most functions)
DST - VESDA distributor (access all functions)

Operating Temperature:

Ambient: 32° to 103°F (0° to 39°C)

Humidity: 10 - 99% RH, non-condensing

System Functions Accessed:

- Status & software version
- Descriptive Alarm & Faults
- Smoke & Flow readings
- Push-Button lockout
- Display name (21 chars)
- Alarm Thresholds (Alert, Action, Fire 1 & Fire 2)
- Alarm delays (0-60 seconds)
- Day/Night/Weekend/Holiday Options
- Event Log (up to 18,000 events)
- Zone number and name (21 chars)
- Pipes in use (pipe 1 to 4)
- Aspirator Speed & Flow control
- Confirmation of filter change
- Relay configuration
- Referencing
- AutoLearn™

Addressed Devices: 250 VESDA devices maximum

VESDA Addressed Devices:

- LaserPLUS
- LaserSCANNER
- LaserCOMPACT
- HL1 (High Level Interface)
- Relay modules

- Detectors & Displays
- Detectors & Displays
- Detectors & Displays
- LaserFOCUS with Vnet card
- Remote Relays
REMOTE MOUNTING BOX

19" SUB RACK
