Infra-Red Heat Wand - Type 5502
5000 Series Test Equipment

Patols Infrared heat wand is used to test and commission the 5000 series sensors. The wand uses a rapid controllable thermal energy that provides no visible sign of heat, by producing black body Infrared emissions.

The Patol wand is passed underneath the detectors field of view triggering an alarm. It comes complete with a metal cage to protect users, and surfaces.

Important Safety Instructions

DO NOT immerse cord, plug or the device in water or other liquid.

DO NOT operate any appliance with a damaged cord or plug.

DO NOT attempt repairs yourself. If damaged return the product to Patol or safely discard the product.

CAUTION: Hot surfaces, avoid contact with metal cage whilst the unit is in operation.

DO NOT unplug by pulling on the cord. To unplug, grasp the plug, not the cord.

Specification

Diameter: 95mm (Heating Element)
Temperature: Approx. 350°C
Voltage: 230Vac (115 Vac, available on special request)
Plug: 3 pin GB plug

5502 Used with the following detectors:

Refer to:

5410: Polycarbonate detector with air purge blower
5012: Stainless Steel detector with compressed air purging
5610: ATEX approved detector with compressed air purging
